MASTER TEMPLATE

The generated customer contract must contain only the annexes and subsections corresponding to the services selected in the Guardian configuration form.

DOCUMENT STRUCTURE

How the modular contract is assembled from the Guardian offer form.

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: This page is for the master template only. Do not include it in the final customer contract.

The customer-facing Guardian contract shall be generated from a stable Master Agreement plus only those service annexes corresponding to the modules selected in the Guardian offer form.

- Master Agreement - always included.
- Annex 1 - Equipment & Commercial Schedule - always included.
- Annex 2 - Maintenance & Inspection - include only when selected.
- Annex 3 - Service Support - include only when selected.
- Annex 4 - Parts & Availability - include only when selected.
- Annex 5 - Blade Solutions - include only when selected.
- Annex 6 - Training & Optimization - include only when selected.
- Annex 7 - Digital Services - include only when selected.
- Guardian Configuration Summary and Signatures - always included at the end.

Within each service annex, subsections relating to unselected options must also be removed from the customer copy. The customer should never receive pages containing "not applicable" service descriptions that were not purchased.

{{Weber_Legal_Entity}}

{{Weber_Address}}

{{Weber_Postcode_City}}

{{Weber_Country}}

hereinafter referred to as "Weber".

{{Customer_Legal_Name}}

{{Customer_Address}}

{{Customer_Postcode_City}}

{{Customer_Country}}

hereinafter referred to as the "Customer".

Weber and the Customer are individually referred to as a "Party" and collectively as the "Parties".

1. PURPOSE OF THE AGREEMENT

The purpose of this Guardian Agreement is to support the reliable, efficient and economically sustainable operation of the Customer's Weber equipment throughout its lifecycle.

Guardian is a modular after-sales program. Depending on the modules selected by the Customer, the Agreement may include inspection and preventive maintenance services, technical support, spare-parts services, blade solutions, training and optimization services and digital services.

Only the services expressly identified in the applicable Annexes to this Agreement are included.

The objective of the Guardian program is to:

- improve equipment reliability and availability;
- support preventive maintenance and early identification of technical issues;
- reduce avoidable unplanned downtime;
- support predictable maintenance planning and expenditure;
- ensure access to Weber technical expertise;
- optimize spare-parts and blade management;
- improve operating and maintenance practices; and

- support the continuous optimization of the Customer's installed equipment.

No service, discount, response commitment or other benefit shall be deemed included unless it is expressly stated in this Agreement or in an Annex forming part of it.

2. CONTRACT DOCUMENTS AND MODULAR STRUCTURE

This Agreement consists of this Master Agreement and the Annexes listed below which have been selected for the Customer.

Annex 1 - Equipment & Commercial Schedule: Always applicable.

Annex 2 - Maintenance & Inspection: Applicable only when the Maintenance & Inspection module is selected.

Annex 3 - Service Support: Applicable only when the Service Support module is selected.

Annex 4 - Parts & Availability: Applicable only when the Parts & Availability module is selected.

Annex 5 - Blade Solutions: Applicable only when the Blade Solutions module is selected.

Annex 6 - Training & Optimization: Applicable only when the Training & Optimization module is selected.

Annex 7 - Digital Services: Applicable only when the Digital Services module is selected.

The applicable Annexes form an integral part of this Agreement.

The services apply only to the machines, production lines, modules and locations identified in Annex 1 unless otherwise agreed in writing.

If there is a conflict between the documents forming this Agreement, the following order of precedence shall apply:

1. Annex 1 - Equipment & Commercial Schedule;
2. the applicable service-specific Annex;
3. this Master Agreement; and
4. Weber's applicable General Terms and Conditions.

Customer-specific deviations expressly stated in Annex 1 shall prevail over standard provisions relating to the same subject.

3. DEFINITIONS

Equipment: the machines, modules, systems or other equipment expressly listed in Annex 1.

Inspection: the assessment of the actual condition of Equipment for the purpose of identifying wear, irregularities, required maintenance and potential actions necessary to support its future operation.

Preventive Maintenance: scheduled measures intended to reduce deterioration and the risk of failure, including adjustment, lubrication, cleaning, replacement of defined wear parts and other activities expressly included in the applicable service scope.

Corrective Maintenance / Repair: work intended to restore Equipment to the required operating condition following a fault, failure or identified defect.

Wear Parts: components which, by their intended function and depending on operating conditions and usage, are expected to require periodic replacement.

Spare Parts: replacement components supplied for the Equipment.

Services: the Guardian services expressly selected and described in the applicable Annexes.

Service Visit: an agreed physical visit by Weber personnel or an authorized Weber service partner to the Customer's site.

Remote Support: technical assistance provided without a physical visit, including telephone, email, digital communication and, where available and authorized, remote connection to Equipment.

Contract Year: each consecutive twelve-month period beginning on the Contract Start Date.

4. EQUIPMENT COVERED

The Guardian Agreement applies exclusively to the Equipment listed in Annex 1.

Annex 1 shall identify, as applicable:

- Customer production line;
- Weber machine reference;
- serial number;
- equipment type;
- modules included;
- service frequency;
- planned inspection or service time;
- selected Guardian modules;
- applicable service price; and
- any machine-specific commercial conditions.

The Customer shall notify Weber in writing of any relocation, material modification, disposal or sale of Equipment covered by this Agreement.

Where Equipment is sold or permanently transferred to another legal entity or location, the continuation of the Guardian Agreement shall be subject to written confirmation by Weber.

The Parties may add or remove Equipment during the contract term by written amendment to Annex 1.

5. GENERAL SERVICE PRINCIPLES

Weber shall perform the selected Services using appropriately qualified personnel and in accordance with generally accepted technical standards and Weber service procedures applicable to the relevant Equipment.

Weber may use qualified Weber affiliated companies or authorized Weber service partners for the performance of Services.

Weber shall determine the number and qualification of technicians reasonably necessary for the applicable service activity, taking into account the Equipment configuration and scope of work.

The Guardian Agreement does not constitute a guarantee that Equipment will operate without interruption or failure.

Unless expressly included in an applicable Annex, the following are not included in the fixed Guardian fee:

- corrective repairs;
- replacement parts;
- wear parts and consumables;
- upgrades or modifications;
- third-party equipment;
- work outside the agreed service hours;
- emergency interventions;
- additional travel;
- special access equipment;
- production materials;
- special tooling not normally required for the relevant Weber Equipment; and
- work resulting from misuse, damage, external causes or modifications not approved by Weber.

Such services may be quoted and ordered separately.

6. CUSTOMER COOPERATION

The Customer shall provide the cooperation reasonably required for Weber to perform the Services.

In particular, the Customer shall ensure that:

1. Weber personnel have safe and timely access to the relevant Equipment;
2. the Equipment is available at the agreed time;
3. the Equipment is in a reasonably clean and accessible condition;
4. production can be interrupted where required for the agreed work;
5. utilities and technical connections required for the work, including electricity, compressed air, water, network access or VPN access where applicable, are available;
6. suitable Customer personnel are available where assistance is required;
7. sufficient original product is available where a production or functional test is required;
8. Weber is informed in advance of known faults, unusual operating conditions or safety requirements;
9. all site-specific health and safety requirements are communicated to Weber before work begins; and
10. a Customer representative with sufficient authority is available to approve additional work or the replacement of components where necessary.

Any delay, waiting time or additional expense resulting from the Customer's failure to fulfil these obligations may be charged separately in accordance with the applicable Weber rates.

7. SCHEDULING

Planned inspections, maintenance visits, training and other scheduled Services shall be coordinated between Weber and the Customer.

Weber shall use reasonable efforts to provide the Customer with advance notice of the planned date.

The applicable notice period, where specifically agreed, shall be stated in the relevant Annex or Annex 1.

If either Party becomes unable to perform an agreed activity on the scheduled date, it shall inform the other Party as soon as reasonably possible.

Where a scheduled visit cannot be performed for reasons attributable to the Customer, Weber may charge any costs reasonably incurred, including travel, accommodation, waiting time and reserved personnel capacity.

8. ADDITIONAL WORK IDENTIFIED DURING A SERVICE ACTIVITY

Where an inspection, maintenance activity, audit or other Guardian service identifies additional work, Weber shall inform the Customer.

Unless Annex 1 expressly provides otherwise, such additional work shall not automatically form part of the Guardian fixed fee.

Corrective maintenance, repairs, modifications, upgrades and the replacement of parts identified during an inspection shall require Customer authorization.

Where appropriate, Weber may issue a separate quotation or spare-parts recommendation following the service activity.

No additional chargeable work shall be intentionally performed without Customer authorization, except where immediate action is reasonably necessary to prevent an imminent safety risk and such action is permitted by applicable law and site rules.

9. PRICES AND PAYMENT

The prices applicable to the Guardian Agreement are stated in Annex 1.

Unless expressly stated otherwise, all prices are exclusive of VAT and other applicable taxes.

The applicable currency, billing frequency, payment terms, travel conditions, freight conditions, discounts and additional service rates shall be those specified in Annex 1 or the applicable service Annex.

Recurring Guardian fees shall be invoiced according to the billing frequency stated in Annex 1.

Services, materials and expenses not included in the agreed Guardian fee shall be invoiced separately at the applicable agreed rates.

Weber may adjust recurring prices in accordance with the annual price adjustment mechanism stated in Annex 1.

Any agreed discount applies only to the categories expressly identified in the relevant Annex and shall not be combined with other discounts unless expressly agreed.

10. PARTS AND MATERIALS

Unless specifically included in Annex 1 or an applicable service Annex, spare parts, wear parts, blades, lubricants and other materials are not included in the Guardian service fee.

Parts supplied by Weber shall be invoiced at the price applicable at the date of supply, less any Guardian discount expressly agreed under Annex 4 or Annex 5.

Where replaced components are made available to the Customer for inspection, the Customer shall be responsible for their subsequent disposal unless otherwise agreed.

Weber shall not be responsible for defects, damage, reduced performance or consequential effects caused by non-original components, unauthorized modifications or work performed by third parties, to the extent permitted by applicable law.

Title to supplied goods shall remain with Weber until full payment has been received where permitted under the applicable local terms and law.

11. ACCEPTANCE AND SERVICE REPORTING

Where the nature of a Service allows functional verification, the Customer shall provide Weber with a reasonable opportunity to test the Equipment following completion of the activity.

Where the Customer identifies a material deficiency in the performance of a Service, it shall notify Weber without undue delay and provide sufficient information to allow Weber to assess the issue.

If a Service has demonstrably not been performed in accordance with the agreed scope and Weber is responsible for the deficiency, Weber shall, as its primary remedy, re-perform or correct the affected Service within a reasonable period.

Service reports, inspection reports, audit reports and recommendations document the condition observed at the time of the activity and do not constitute a guarantee of future machine performance.

12. WARRANTY AND LIABILITY

Weber shall perform the Services with reasonable professional care and skill.

Weber's liability shall be governed by the mandatory provisions of the applicable law and Weber's applicable General Terms and Conditions.

To the maximum extent permitted by law, Weber shall not be liable for indirect or consequential losses, including loss of production, loss of profit, loss of business or other indirect commercial loss, except where such limitation is prohibited by applicable law.

Nothing in this Agreement shall exclude liability which cannot legally be excluded or limited.

Where a failure or delay results from circumstances outside Weber's reasonable control, including failure or delay by suppliers, transportation disruption, industrial action, natural events, governmental measures, cyber incidents, epidemics or other events of force majeure, the affected performance period shall be extended as reasonably necessary.

13. CONTRACT TERM AND RENEWAL

This Agreement enters into force on the Contract Start Date stated in Annex 1.

Initial Term	{{Contract_Duration}}
Renewal Term	{{Renewal_Term}}
Notice Period	{{Termination_Notice_Period}}

Unless otherwise stated in Annex 1, the Agreement shall automatically renew for successive renewal periods unless terminated in writing within the applicable notice period.

The termination or expiry of the Master Agreement shall terminate all service Annexes unless otherwise expressly agreed.

Individual optional services may have different commencement or expiry dates where expressly stated in the relevant Annex.

14. CHANGES TO THE AGREEMENT

Changes to Equipment covered, service frequency, Guardian modules, discounts, service levels, pricing or other material contractual conditions shall be documented in writing.

An updated Annex generated and accepted by both Parties may constitute such written amendment.

15. CONFIDENTIALITY

Each Party shall keep confidential all non-public commercial, technical and operational information received from the other Party in connection with this Agreement.

Such information shall be used only for the performance and administration of the Guardian relationship.

This obligation shall not apply to information which:

- is already lawfully in the public domain;
- was lawfully known to the receiving Party before disclosure;
- is received lawfully from a third party without confidentiality restrictions; or
- must be disclosed by law or competent authority.

16. INTELLECTUAL PROPERTY

All intellectual property rights in Weber documentation, service methods, checklists, software, technical information, training materials, analyses and other proprietary Weber content remain the property of Weber or the applicable rights holder.

The Customer may use documentation provided under this Agreement internally for the operation and maintenance of its Equipment.

No intellectual property rights are transferred to the Customer unless expressly agreed in writing.

17. ASSIGNMENT AND SERVICE PARTNERS

Weber may perform its obligations through Weber group companies or qualified and authorized Weber service partners.

Weber may assign rights and obligations under this Agreement to another Weber group company subject to applicable law.

The Customer may not assign this Agreement to a third party without Weber's prior written consent, such consent not to be unreasonably withheld where continuation of the contractual relationship is commercially and technically feasible.

18. GOVERNING LAW AND JURISDICTION

Governing Law	{{Governing_Law}}
Jurisdiction	{{Jurisdiction}}

The above provisions are subject in each case to mandatory applicable law.

19. GENERAL PROVISIONS

If any provision of this Agreement is found to be invalid or unenforceable, the remaining provisions shall remain unaffected.

Failure by either Party to exercise a contractual right shall not constitute a waiver of that right.

This Agreement and its applicable Annexes constitute the agreement between the Parties concerning the Guardian Services described herein and replace prior proposals or understandings relating specifically to the same service scope, unless expressly incorporated.

Amendments shall be made in writing.

Electronic signatures may be used where legally permitted and shall have the same effect as handwritten signatures.

ANNEX 1 - EQUIPMENT & COMMERCIAL SCHEDULE

This Annex is always included in the customer contract.

1. Contract Information

Customer	{{Customer_Legal_Name}}
Customer No.	{{Customer_Number}}

{{Line_1}}	{{Machine_1}}	{{Serial_1}}	{{Type_1}}	{{Modules_1}}	{{Frequency_1}}
{{Line_2}}	{{Machine_2}}	{{Serial_2}}	{{Type_2}}	{{Modules_2}}	{{Frequency_2}}
...	...	...	...	...	...

3. Selected Guardian Modules

The following Guardian modules form part of this Agreement:

- ☐ Maintenance & Inspection
- ☐ Service Support
- ☐ Parts & Availability
- ☐ Blade Solutions
- ☐ Training & Optimization
- ☐ Digital Services

Only the Annexes corresponding to the selected modules above are attached to and form part of the Agreement.

4. Commercial Summary

{{Special_Commercial_Conditions}}

ANNEX 2 - MAINTENANCE & INSPECTION

Inspection, preventive maintenance and machine-condition services.

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this Annex only if "Maintenance & Inspection" is selected.

1. Purpose

The Maintenance & Inspection module is intended to assess and maintain the condition of the Equipment identified in Annex 1, identify required technical actions and support reliable operation and maintenance planning.

The exact activities included depend on the options selected in the Guardian configuration.

2. Inspection

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if Inspection / Annual Inspection is selected.

Weber shall perform inspections of the selected Equipment at the frequency stated in Annex 1.

An inspection may include, where applicable to the selected Equipment:

- review of the general machine condition;
- inspection based on Weber's machine- or module-specific checklist;
- review of relevant sensors and electrical components;
- inspection of drives, belts and mechanical components;
- inspection of pneumatic components;
- inspection of seals and machine housings;
- verification and adjustment of mechanically movable components where reasonably required;
- review of relevant machine settings;
- identification of visible wear or abnormalities;
- identification of outstanding repair or maintenance requirements;
- discussion of known issues with the Customer's responsible personnel; and
- functional verification following the inspection where appropriate.

Where useful and operationally possible, Weber may review the production process using the Customer's original product.

Opening of specific protected machine areas, such as weighing or cutting-head housings, shall be carried out where technically appropriate and agreed.

3. Machine Checklist

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if "Machine Checklist" is selected.

Weber shall document the inspection using the applicable Weber inspection checklist.

The checklist records the inspected elements and their observed condition at the time of the inspection.

The checklist is intended as a technical service record and does not constitute certification that the Equipment is free from defects or that no future failure may occur.

4. Inspection Report

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if "Inspection Report" is selected.

Following the inspection, Weber shall provide an inspection report summarizing the principal findings.

The report may include:

- condition findings;
- identified wear;
- recommended maintenance or repairs;
- recommended spare parts;
- technical observations;
- identified risks requiring further attention; and
- recommended priorities or next actions.

Where appropriate, Weber may prepare a separate quotation for recommended parts, repairs, upgrades or other activities arising from the inspection.

5. Preventive Maintenance

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if "Preventive Maintenance" is selected in the detailed configuration.

Weber shall perform the preventive maintenance activities expressly defined for the Equipment in Annex 1.

Preventive maintenance may include:

- mechanical adjustment;
- lubrication;
- cleaning of technically relevant components;
- replacement of defined filters, seals or wear components;
- checking and adjustment of drives and belts;
- checking of pneumatic elements;
- checking of electrical and sensor components; and
- other machine-specific preventive maintenance tasks identified in the applicable Weber maintenance plan.

Replacement parts, wear parts and consumables are not included unless expressly stated in Annex 1 or in an agreed maintenance kit.

6. Spare Parts / Maintenance Kit

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if a Spare Parts or Maintenance Kit is selected.

The maintenance kit shall contain only the parts expressly identified in the applicable quotation or equipment schedule.

The price of the kit shall be shown separately in Annex 1.

Unused parts remain subject to the commercial conditions stated in Annex 1.

7. Additional Maintenance and Repairs

Repairs and corrective maintenance identified during an inspection are not included in the standard inspection price unless specifically stated otherwise.

Where additional work is recommended, Weber shall obtain Customer approval or issue a separate quotation.

8. Inspection Frequency

Frequency	{{Inspection_Frequency}}
Planned Inspections per Contract Year	{{Number_Of_Inspections}}

The actual schedule shall be coordinated between Weber and the Customer.

9. Service Hours

Services shall normally be performed during: {{Standard_Service_Hours}}

Work requested outside these hours may be subject to additional charges.

ANNEX 3 - SERVICE SUPPORT

Hotline, remote support and prioritized technical response.

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this Annex only if "Service Support" is selected.

1. Purpose

The Service Support module provides the Customer with access to Weber technical support for Equipment covered by this Agreement.

The exact service level depends on the options selected below.

2. Standard Hotline

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if "Standard Hotline" is selected.

The Customer shall have access to the Weber service hotline during the applicable support hours.

Support Hours	{{Hotline_Service_Hours}}
Telephone	{{Hotline_Number}}
Email	{{Service_Email}}

The hotline provides first-level technical support and coordination.

Where the issue cannot be resolved through the hotline, Weber may recommend Remote Support, an on-site service visit, replacement parts or other technical action.

On-site service is not included merely by reason of having Standard Hotline support unless expressly stated in Annex 1.

3. Remote Support

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if "Remote Support" is selected.

Where technically available and authorized by the Customer, Weber may provide remote diagnostic and technical support.

The Customer shall provide the network connections, VPN access, user authorization and other technical conditions reasonably necessary for remote access.

Remote Support may include:

- remote fault analysis;
- review of machine status or diagnostic information;
- assistance with parameter or configuration checks;
- support to Customer maintenance personnel; and
- recommendations for further action.

Remote Support does not guarantee that a fault can be corrected without an on-site intervention.

4. Priority Response

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if "Priority Response" is selected.

Requests relating to Equipment covered by this Agreement shall receive prioritized handling within Weber's service organization compared with standard non-contract requests, subject to technician availability and the applicable service level.

Target First Response	{{Priority_Response_Target}}
-----------------------	------------------------------

Priority Response refers to prioritization of the support request. It does not constitute a guaranteed repair time, guaranteed machine uptime or guaranteed on-site arrival time unless expressly stated otherwise in Annex 1.

ANNEX 4 - PARTS & AVAILABILITY

Spare-parts commercial conditions, priority handling and recommended stock.

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this Annex only if "Parts & Availability" is selected.

1. Purpose

The Parts & Availability module supports structured spare-parts planning and access to Weber original spare parts for the Equipment covered by this Agreement.

2. Parts Discount

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if "Parts Discount" is selected.

The Customer shall receive the following discount on eligible Weber spare parts for Equipment covered by the Guardian Agreement:

Guardian Parts Discount	{{Parts_Discount}} %
--------------------------------	----------------------

The discount applies to Weber original spare parts unless otherwise stated.

The following may be excluded:

- exchange parts;
- blades;
- special-price items;
- third-party products;
- freight and express charges;
- services and labor; and
- items already subject to another special price or discount.

Discounts are not cumulative unless expressly agreed.

3. Priority Handling

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if "Priority Handling" is selected.

Parts inquiries and orders relating to Equipment covered by this Agreement shall receive priority handling within the applicable Weber parts organization.

Priority handling includes accelerated internal processing where reasonably possible.

It does not constitute a guaranteed delivery time where the requested part is not available from stock or where delivery depends on external suppliers, production or transportation.

4. Recommended Parts List

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if "Recommended Parts List" is selected.

Weber shall provide, where technically and commercially available, a recommended spare-parts list for the selected Equipment.

A - Local / immediately available items: Parts normally available from the responsible Weber organization.

B - Central stock items: Parts normally available from Weber central stock.

C - Recommended customer-stock items: Critical or higher-risk spare parts which Weber recommends the Customer hold locally.

D - Wear parts: Parts expected to require replacement depending on usage.

E - Make-to-order / long-lead-time parts: Parts which are not normally stocked and may require manufacturing or extended procurement lead time.

The recommended parts list constitutes a recommendation based on the available machine configuration and service information. It is not a guarantee that every possible failure scenario is covered.

5. Delivery Conditions

Stock availability and delivery conditions shall be subject to Annex 1.

Standard Delivery Condition	{{Parts_Delivery_Condition}}
Freight-Free Threshold	{{Freight_Free_Threshold}}
Express / Courier Costs	Charged separately unless otherwise agreed.

ANNEX 5 - BLADE SOLUTIONS

Commercial, availability and technical support for Weber blade programs.

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this Annex only if "Blade Solutions" is selected.

The Blade Solutions module is intended to support the correct selection, availability, use and management of Weber blades, including the principle "Right Blade, Right Application".

1. Blade Discount

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if "Blade Discount" is selected.

The Customer shall receive the following Guardian discount on eligible Weber blades:

Blade Discount	{{Blade_Discount}} %
-----------------------	----------------------

The applicable blades, Customer locations, machines, committed quantities and any special pricing shall be listed in the commercial schedule where required.

Blade discounts are not cumulative with other blade promotions or special prices unless expressly agreed.

Where fixed-term blade pricing is agreed, the applicable term and pricing conditions shall be stated in Annex 1.

2. Stock Agreement

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if "Stock Agreement" is selected.

Weber and the Customer may establish an agreed blade stock concept based on expected consumption.

The stock agreement shall define, where applicable:

- blade references;
- agreed stock quantity;
- minimum stock;
- maximum stock;
- expected annual consumption;
- replenishment method;
- stock location;
- ownership of stock;
- delivery conditions; and
- treatment of obsolete or unused stock.

The Customer shall provide reasonably accurate consumption information and notify Weber of material changes in production or blade demand.

The stock arrangement is intended to improve availability but does not constitute an unconditional guarantee of uninterrupted supply in circumstances outside Weber's reasonable control.

3. Sharpening Assessment

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if "Sharpening Assessment" is selected.

Weber shall assess the Customer's blade sharpening process and capability as agreed.

The assessment may include:

- sharpening equipment;
- sharpening process;
- blade handling;
- blade condition;
- grinding parameters;
- maintenance practices;
- blade storage;
- process consistency; and
- opportunities for improvement.

Weber may issue recommendations following the assessment.

Unless specifically included, implementation of those recommendations, repairs or modifications to sharpening equipment and additional training are not included.

4. Blade Application Review

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection when Blade Application Review is part of the selected Blade Program configuration.

Where included in the selected Blade Program, Weber may review the blade-to-product combination with the objective of supporting the principle "Right Blade, Right Application".

Recommendations may consider product type, slicing conditions, machine configuration, blade geometry and operational requirements.

ANNEX 6 - TRAINING & OPTIMIZATION

Operator training, maintenance training, line optimization and EPIP audits.

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this Annex only if "Training & Optimization" is selected.

The Training & Optimization module provides selected activities intended to improve machine operation, maintenance capability and production performance.

1. Operator Training

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if "Operator Training" is selected.

Weber shall provide operator-focused training for the selected Equipment.

The training content may include, depending on the machine and agreed objectives:

- correct machine operation;
- basic machine settings;
- operating routines;
- product changeover;
- operator-level checks;
- cleaning and inspection considerations;
- identification of abnormal machine behavior; and
- good operating practices.

Number of Sessions / Days	{{Operator_Training_Quantity}}
----------------------------------	--------------------------------

Training shall be conducted for the Customer's nominated personnel.

Unless expressly stated otherwise, training does not constitute formal certification of Customer personnel.

2. Maintenance Training

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if "Maintenance Training" is selected.

Weber shall provide technical training for the Customer's maintenance personnel.

Training may include:

- machine construction and functional principles;
- preventive maintenance;
- inspection points;
- wear-part identification;
- troubleshooting methodology;
- mechanical adjustment;
- relevant electrical or pneumatic components;
- maintenance documentation; and
- recommended maintenance practices.

Number of Sessions / Days	{{Maintenance_Training_Quantity}}
----------------------------------	-----------------------------------

3. Line Optimization

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if "Line Optimization" is selected.

Weber shall perform an agreed review of the selected production line with the objective of identifying opportunities to improve performance.

The activity may include:

- review of machine parameters;
- observation of production;
- analysis of operating conditions;
- review of line interaction;
- identification of performance restrictions;
- adjustment of selected parameters where appropriate; and
- recommendations for further improvement.

Number of Optimization Activities	{{Line_Optimization_Quantity}}
--	--------------------------------

Line Optimization does not constitute a guarantee of a specific output, yield, OEE, giveaway reduction or other performance improvement unless a specific performance commitment is expressly agreed in writing.

4. EPIP Audit

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if "EPIP Audit" is selected.

Weber shall perform an EPIP audit on the Equipment or lines specified in Annex 1.

The audit shall include an assessment of the selected line and a report identifying relevant findings, opportunities and priority actions.

Where applicable, the results shall be reviewed with the Customer and incorporated into the ongoing Guardian action plan.

Number of EPIP Audits	{{EPIP_Audit_Quantity}}
Lines Covered	{{EPIP_Lines}}

Corrective actions, repairs, upgrades or parts resulting from the audit are not included unless expressly stated.

5. Follow-Up

Where included in the selected package, Weber may conduct follow-up meetings or calls before and after selected activities to review:

- agreed objectives;
- completed activities;
- observed impact;
- outstanding action items;
- technical priorities; and

- next actions.

ANNEX 7 - DIGITAL SERVICES

Factory Cockpit, performance review, MRO review and dedicated account ownership.

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this Annex only if "Digital Services" is selected.

The Digital Services module provides selected digital monitoring, performance-review and account-management services.

1. Factory Cockpit

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if "Factory Cockpit" is selected.

Where the selected Equipment is technically compatible, Weber shall support connection of the agreed Equipment to Factory Cockpit in accordance with the applicable digital service conditions.

Connected Line(s)	{{Factory_Cockpit_Lines}}
--------------------------	---------------------------

Factory Cockpit may be used to collect and visualize available machine performance data for the purpose of performance review and optimization.

The Customer shall provide the network infrastructure, permissions and technical access reasonably required for the connection.

Availability of specific data depends on the machine generation, installed software and connectivity of the relevant Equipment.

Any separate software licence or digital-service terms applicable to Factory Cockpit shall remain applicable.

2. Performance Review

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if "Performance Review" is selected.

Weber and the Customer shall conduct periodic reviews of available Equipment performance data.

Review Frequency	{{Performance_Review_Frequency}}
-------------------------	----------------------------------

The review may include:

- selected machine KPIs;
- performance trends;
- recurring technical observations;
- identified improvement opportunities;
- completed activities;
- pending actions; and
- priorities for the next review period.

The Parties may agree specific Customer KPIs and target values.

Unless expressly agreed otherwise, such target values are management objectives and not contractual performance guarantees.

3. MRO Review

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if "MRO Review" is selected.

Weber shall periodically review relevant Maintenance, Repair and Operations expenditure information available for the covered Equipment.

The review may include:

- spare-parts expenditure;
- service expenditure;
- blade expenditure where relevant;
- historical maintenance activity;
- installed-base information;
- maintenance trends;
- identified cost drivers; and
- comparison against an agreed MRO planning target.

MRO Review Frequency	{{MRO_Review_Frequency}}
Agreed MRO Target, if applicable	{{MRO_Target}}

The purpose of the review is to support maintenance planning and identify improvement opportunities. It does not constitute a guarantee that a particular MRO expenditure level will be achieved.

4. Dedicated Account Team

INTERNAL GENERATION RULE - REMOVE FROM CUSTOMER COPY: Include this subsection only if "Dedicated Account Team" is selected.

Weber shall assign a Guardian account ownership structure for the Customer.

The team shall coordinate selected Guardian activities and act as a central point for periodic program review.

The account-management process may include:

- scheduled Customer reviews;
- coordination between relevant Weber functions;
- review of open actions;
- review of upcoming service activities;
- review of parts and blade requirements;
- performance discussions;
- optimization opportunities; and
- follow-up of agreed actions.

Review Cadence	{{Account_Review_Frequency}}
-----------------------	------------------------------

The dedicated account team supplements, but does not replace, the normal Weber operational channels for urgent service requests, spare-parts orders or emergency support.

GUARDIAN CONFIGURATION SUMMARY

Final customer-facing overview of the selected scope.

The following summary confirms the Guardian configuration purchased by the Customer under this Agreement.

Customer	{{Customer_Legal_Name}}
Site	{{Customer_Site}}
Contract Start	{{Contract_Start_Date}}
Contract Term	{{Contract_Duration}}
Equipment Covered	{{Number_Of_Machines}} machines / {{Number_Of_Lines}} production lines
Annual / Contract Value	{{Total_Contract_Value}}

Your Guardian

Guardian Module	Selected Scope
Maintenance & Inspection	{{Selected_Maintenance_Options}}
Service Support	{{Selected_Service_Support_Options}}
Parts & Availability	{{Selected_Parts_Options}}
Blade Solutions	{{Selected_Blade_Options}}
Training & Optimization	{{Selected_Training_Options}}
